

Tarakeeb: Training

Apple IT

What is Apple IT Training?

Apple offers technical training for professionals who are responsible for planning, maintaining, and integrating Mac OS X, Mac OS X Server, Xserves, and Xserve RAID into a network environment.

The curriculum objectives support a tiered certification program for system administrators, technical coordinators, and support professionals.

Apple IT Careers

The IT Career is diverse and involves different levels of specialization and experience in different sides of the used software, operating system, network and hardware.

Acquiring any career based on using the Mac OS X involves basic comprehensive knowledge of the system.

A **Help Desk Professional** or a **Support Professional** supports Mac OS X users or work in a business that uses Mac OS X systems.

A **Technical Coordinator** or A Power User manages networks of Mac OS X systems in your organization.

System Administrators and **Engineers** manage medium-to-large networks of systems in complex multiplatform deployments. Their role is to install and configure machines; architect and maintain networks; enable, customize, tune, and troubleshoot a wide range of services; and integrate Mac OS X, Mac OS X Server, and other Apple technologies within a multi-platform networked environment.

Apple IT Topics

Mac OS X

Loaded with innovations, Mac OS X is the world's most advanced operating system. Organise your files in stacks, browse files with Cover Flow, use Quick Look to preview files without even opening them, go back in time to restore old files with Time Machine, send email using personalised stationery, add effects to video chats and much more.

Mac OS X Server 10.6

Mac OS X Server v10.6 Snow Leopard is a powerful 64-bit server operating system with features and applications that make it easier for everyone in your organization to collaborate, communicate, and share information.

With Mac OS X Server, users can effortlessly share files, schedule meetings and events, exchange instant messages, send and receive mail on the Internet, access the organization's network remotely, publish podcasts, and host websites, wikis, and blogs. And Snow Leopard Server is up to twice as fast as its predecessor, improving performance for file sharing, mail, web hosting, and more.

Xsan

Share terabytes of data over an ultrafast Fibre Channel network with Xsan 2, the high-performance 64-bit SAN file system for Mac OS X.

Xsan is a powerful and scalable solution for enterprise storage consolidation and demanding video post-production and broadcast workflows.

Introduction to Mac OS X v10.6

Snow 100: An Introduction to Mac OS X v10.6

Course Description

Introduction to Mac OS X is a **1-day** preliminary course for those new to Mac OS X who need to prepare for the Mac OS X Support Essentials course, or other technical Mac OS X training courses. This course focuses on getting to know the foundations of Mac OS X, with topics ranging from efficient window and application management to system customization. You'll also learn how to configure user accounts and manage files.

Course Outlines

- ↳ About Apple
- ↳ Mac OS X Interface
- ↳ Navigation (The Finder)
- ↳ Mac OS X Workspace (Getting More out of Your Mac)
- ↳ Mac OS Built In Applications
- ↳ Using Network
- ↳ System Preferences
- ↳ Utilities
- ↳ Introducing Mac OS Bundled Software

Mac OS X Support Essentials v10.6

Snow 101: Mac OS X Support Essentials v10.6 Qualifies for an exam that qualifies for the following certificate:

Apple Certified Support Professional (ACSP)

Mac OS X Support Essentials v10.6 exam

And qualifies partly for the following certificate:

Apple Certified Technical Co-ordinator (ACTC)

Apple Certified Support Professional v10.6 Certificate

Mac OS X Server Essentials v10.6 Exam

Course Description

Mac OS X Support Essentials is a **3-days**, hands-on course that provides an in-depth exploration of troubleshooting on Mac OS X. This course is designed to give you a tour of the breadth of functionality of Mac OS X and the best methods for effectively supporting users of Mac OS X systems. The course is a combination of lectures and hands-on case study exercises that provide practical real-world experience.

Course Outlines

- ↳ Installation & Initial Setup
- ↳ User Accounts
- ↳ Commandline & Automation
- ↳ File Systems
- ↳ File Management
- ↳ Applications
- ↳ Network Configuration
- ↳ Network Services
- ↳ Peripherals
- ↳ Startup Process

Mac OS X Server Essentials v10.6

Snow 201: Mac OS X Server Essentials v10.6 Qualifies for an exam that qualifies partly for the following certificates:

Apple Certified Technical Co-ordinator (ACTC)
Apple Certified Support Professional v10.6 Certificate
Mac OS X Server Essentials v10.6 Exam

Apple Certified System administrator (ACSA)
Mac OS X Server Essentials v10.6 Exam
Mac OS X Direcopy Services v10.6 Exam
Mac OS X Deployment v10.6 Exam
Mac OS X Advanced System Administration v10.6 Exam

Apple Certified Media Administrator (ACMA)	
Xsan 2 Administration Exam	
Final Cut Server 1.5 Administration Exam	
Mac OS X Server Essentials v10.6 Exam	
One of	Mac OS X Support Essentials v10.6 Exam
	Final Cut Pro 7, Level 1 Exam

and qualifies partly for the following certificates as part of the ACTC 10.6 certificate:

Apple Certified Specialist - Directory 10.6
Apple Certified Technical Co-ordinator v10.6 Certificate
Mac OS X Direcopy Services v10.6 Exam

Apple Certified Specialist - Deployment 10.6
Apple Certified Technical Co-ordinator v10.6 Certificate
Mac OS X Deployment v10.6 Exam

Course Description

Mac OS X Server Essentials is a **4-days** course designed to give technical coordinators and entry-level system administrators the skills, tools, and knowledge to implement and maintain a network that uses Mac OS X Server.

Students learn how to install and configure Mac OS X Server to provide network-based services, such as file sharing, mail, web and wikis. Tools for efficiently managing and deploying Mac OS X and software updates are also covered.

The course is a combination of lectures and hands-on case study exercises that provide practical real-world experience.

Course Outlines

- ↳ Installing & Configuring Mac OS X Server
- ↳ Authenticating & Authorizing Accounts
- ↳ Using Open Directory
- ↳ Using File Services
- ↳ Hosting Mail Services
- ↳ Managing Web Services
- ↳ Using Collaborative Services
- ↳ Implementing Deployment Solutions
- ↳ Managing Accounts

Mac OS X Directory Services v10.6

Snow 301: Mac OS X Directory Services v10.6 Qualifies for an exam that qualifies partly for the following certificate:

Apple Certified System Administrator (ACSA)
Mac OS X Server Essentials v10.6 Exam
Mac OS X Directory Services v10.6 Exam
Mac OS X Deployment v10.6 Exam
Mac OS X Security and Mobility v10.6 Exam

Apple Certified Specialist - Directory 10.6
Apple Certified Technical Co-ordinator v10.6 Certificate
Mac OS X Directory Services v10.6 Exam

Course Description

This **4-days** course focuses on both Mac OS X as a directory service client, and Mac OS X Server as a directory server. Cross platform solutions are emphasized in both instances.

In working with Mac OS X, you'll learn how to use network accounts and Kerberos authentication with any common directory service, such as Apple's Open Directory, Microsoft's Active Directory, or an industry-standard LDAP server. In working with Mac OS X Server, you'll learn how to run a robust, scalable directory system using Apple's Open Directory server. Students also learn how to use Mac OS X Server to augment an existing directory service infrastructure.

Course Outlines

- ↳ Accessing the Local Directory Service
- ↳ Accessing an Open Directory System
- ↳ Accessing an LDAP Server
- ↳ Accessing an Active Directory System
- ↳ Configuring Open Directory Server
- ↳ Configuring Open Directory Replicas
- ↳ Connecting Mac OS X Server to an Open Directory System
- ↳ Integrating Mac OS X Server with Other Systems

Mac OS X Deployment v10.6

Snow 302: Mac OS X Deployment v10.6

Qualifies for an exam that qualifies partly for the following certificate:

Apple Certified System administrator (ACSA)
Mac OS X Server Essentials v10.6 Exam
Mac OS X Directory Services v10.6 Exam
Mac OS X Deployment v10.6 Exam
Mac OS X Security and Mobility v10.6 Exam

Apple Certified Specialist - Deployment 10.6
Apple Certified Technical Co-ordinator v10.6 Certificate
Mac OS X Deployment v10.6 Exam

Course Description

This **3-days** course focuses on solutions for deploying software, ranging from the installation of individual files to the deployment of complete system images to multiple computers. You'll apply what you've learned to create a full deployment plan that includes testing, hardware and software deployment, auditing and maintenance.

You'll also learn how to create a tiered Software Update server solution, as well as about third-party solutions to supplement tools provided by Apple. You'll get hands-on experience in using tools such as Apple Remote Desktop, Disk Utility, PackageMaker, and System Image Utility and discuss the pros and cons of each for different deployment situations.

Course Outlines

- ↳ Deployment Planning
- ↳ Deploying Individual Items and Containers
- ↳ Deploying with Installation Packages
- ↳ Deploying Entire Systems
- ↳ Using NetBoot for Deployment
- ↳ Postimaging Deployment Considerations
- ↳ System Maintenance

Xsan 2 Administration

Xsan 301: Xsan 2 Administration

Qualifies for an exam that qualifies partly for the following certificate:

Apple Certified Media Administrator (ACMA)	
Xsan 2 Administration Exam	
Final Cut Server 1.5 Administration Exam	
Mac OS X Server Essentials v10.6 Exam	
One of	Mac OS X Support Essentials v10.6 Exam
	Final Cut Pro 7, Level 1 Exam

Course Description

The **3-days** Xsan 2 Administration course focuses on deploying storage area networks. Students configure, performance tune, and troubleshoot a storage area network using Apple's Xsan 2 tools. The course also covers storage resource management and data protection. Learn how to implement and administer Xsan 2, Apple's enterprise file system designed for storage area networks (SAN). Take advantage of Xsan 2's built-in flexibility and create shared volumes on your SAN compatible with third-party products, maximizing the return on your storage investment. Use the skills, tools, and knowledge from this course to set up, manage, and monitor the SAN that's right for your organization.

Course Outlines

- ↳ Concepts
- ↳ Deployment
- ↳ Client Management
- ↳ Volume Management
- ↳ Maintenance & Troubleshooting
- ↳ Planning

Xsan 2 for Pro Video

XSan 410: XSan 2 for Pro Video

Qualifies for an exam that qualifies partly for the following certificate:

Apple Certified Media Administrator (ACMA)	
Xsan 2 Administration Exam	
Final Cut Server 1.5 Administration Exam	
Mac OS X Server Essentials v10.6 Exam	
One of	Mac OS X Support Essentials v10.6 Exam
	Final Cut Pro 7, Level 1 Exam

Course Description

This **3-days** class combines a comprehensive theoretical overview with intensive hands-on experience to prepare you for Xsan 2 integrations of any size or configuration. The course covers Xsan components, requirements, topologies, and installation challenge, and provides dedicated time with a system for you to explore implementation from component setup and connection to software installation and configuration.

Course Outlines

- ↳ Understanding SANs
- ↳ Xsan Specifications, Terminology and Configuration Requirements
- ↳ Planning Xsan Deployments
- ↳ Deployment
- ↳ Client Management
- ↳ Volume Management
- ↳ Pro Apps Workflows
- ↳ Maintenance and Troubleshooting
